DETAILED ACTION

1. Claims 1-57 are currently pending. Please take notice of the election to species requirement in paragraph 3. To be fully responsive, applicant must fulfill this requirement.

Election/Restrictions

2. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-44, 56-57, drawn to a method for treatment of lignin-containing material.

Group II, claim(s) 45-55, drawn to a product.

The inventions listed as Groups I-II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: fungicidal composition containing benzyl-tris(aryl)-phosphonium salts as an organic acid anion in

water (see Abstract, Becher et al., WO 91/13073), which is an ionic liquid that can dissociate into anion and cation.

3. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Applicant must elect a specific contact material from Claims 4-7.

Applicant must elect a specific anion component for Claim 10, 11, 12, 14, 37, 38, 39, 41, 46, 47, 48, 50, 55.

Applicant must elect a specific cation component for Claim 15, 16, 42, 43, 51, 52.

Applicant must elect a specific ionic liquid for Claim 17, 44, 53, 54.

Applicant must elect a specific lignin-containing material for Claim 22.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims

are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The claims are deemed to correspond to the species listed above in the following manner:

Claims 4-7 depends on Claim 1.

Claims 10, 11-15 depends on Claim 9, which depends on Claim 1.

Claim 11 depends on Claim 10.

Claim 16 depends on Claim 15.

Claim 17 depends on Claim 1.

Claim 22 depends on Claim 1.

Claims 37-38 depends on Claim 36, which depends on Claim 35.

Claims 39-42 depends on Claim 36.

Claim 43 depends on Claim 42.

Claim 44 depends on Claim 43.

Claims 46-51 depend on Claim 45.

Claim 52 depends on Claim 51.

Claims 54-55 depend on Claim 53.

The following claim(s) are generic: 1, 35, 45, 53.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons:

For Claims 10, 11, 12, 14, 37, 38, 39, 41, 46, 47, 48, 50, 55, 15, 16, 42, 43, 51, 52, 17, 44, 53, 54, the chemicals are structurally distinct; thus, there is a lack of unity.

For Claim 22, the plant materials are from different species; thus, there is a lack of unity.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and the product claims are subsequently found allowable, withdrawn process claims that depend from or otherwise require all the limitations of the allowable product claim will be considered for rejoinder.

All claims directed to a nonelected process invention must require all the limitations of an allowable product claim for that process invention to be rejoined.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103 and 112. Until all claims to the elected product are found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowable product claim will not be rejoined. See MPEP § 821.04(b). Additionally, in order to retain the right to rejoinder in accordance with the above policy, applicant is advised that the process claims should be amended during prosecution to require the limitations of the product claims. **Failure to do so may result in a loss of the right to rejoinder.** Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01. Any inquiry concerning this communication or earlier communications from the examiner should be directed to CATHERYNE CHEN whose telephone number is (571)272-9947. The examiner can normally be reached on Monday to Friday, 9-5 PM.
